## **Acknowledgements**

The OESC Labor Market Information (LMI) Unit would like to thank all who responded to this survey. Only through the cooperation of employers are we able to collect the data necessary for the production of accurate, thorough and timely information about labor market conditions.

The OESC LMI Unit would like to thank Vinod Kapani of the Bureau of Labor Statistics for drawing the stratified random sample for this survey.

We would also like to acknowledge the contributions of the following organizations and individuals. Thank you to the staff of the OESC print shop for their outstanding work and service in meeting the survey questionnaire mail-out schedule. These are James Russell, Reproduction Services Manager; David Henthorn, Offset Press Operator; and Rosa Murray, Information Systems Operations Specialist). In addition, we thank Wayne Everson, Statistical Research Specialist; John Carpenter, Public Information Officer; Kristie Brown, Statistical Research Specialist; and Paul Gore, Statistical Research Specialist.

Special thanks to the Workforce and Economic Research Division of the Oregon Employment Department for permitting us to use their benefit survey questionnaire, which we modified, adapted and tested for use in Oklahoma. We accept full responsibility for any questionnaire deficiencies or imperfections that may have resulted from these changes.

## **Introduction**

A diverse variety of people and groups will find the results of 2014 OESC Oklahoma Employer Benefit Survey interesting and useful. Employers can learn which benefits are typically offered by businesses, while workers can discover what benefits are offered at different companies and in different positions. Others who will find this survey beneficial include educators, career counselors, community development organizations, government officials, and public policy architects. With fewer than two dozen states collecting this kind of data, extensive statewide benefit surveys are in short supply. This may be due to the wide number and range of benefits offered, the various plans offered to different employee groups within the same company, general unavailability of firm contact information, and the decreasingly limit fiscal resources available for research.

Taking advantage of the unique and comprehensive list of state employers available through Oklahoma's Covered Employment and Wages (QCEW) database, researchers in the Labor Market Information Unit of the Economic Research and Analysis division conducted a statewide survey of employers from January 24 to April 15, 2014. The sample was stratified by major industry and firm size. Of the 3,910 employers randomly selected, 1,914 (49.0%) responded to the survey. Employers had the option of replying by mail, fax, e-mail, or telephone or completing the questionnaire online at our website. The four-page survey questionnaire contained 20 questions addressing items relating to the amount and types of paid leave provided, the proportional cost of medical/health/dental plans, types and amount of retirement extended, recent changes in health and retirement plans, extent of a variety of miscellaneous benefits available, and the proportional cost of employee benefits. Data from the respondents were weighted in order to estimate the number and percentage of Oklahoma employers offering each benefit to salaried, full-time hourly and part-time hourly employees. Responding firms employed a combined workforce of 249,736 persons, or 20.4% of the universe of Oklahoma employees. For those that are interested, a more detailed description of the methodology used in collecting and reporting this data is contained in Appendix D of this report.

In this benefit survey report, the data for the 2014 OESC Oklahoma Employer Benefit Survey is divided by four firm sizes and nine major industries, presented in over 260 tables and charts and reported according to three employee categories. The report is divided into nine chapters, one for each major industry. Provisions are made so the survey report can be downloaded by individual industry, by particular page in the report, or in its entirety. The tables in this report provide estimates of the number and percentages of Oklahoma employers in each survey question and response category and include adequate and descriptive footnotes that provide additional information concerning the estimates in the tables. An example of information given in table footnotes is the number and percentage of firms responding to the survey question out of all applicable firms.

# Executive Summary

The Oklahoma Employment Security Commission (OESC) works closely with businesses to provide valuable information regarding Oklahoma's current economy and job market. In keeping with this aspect of our mission, OESC's Economic Research & Analysis Division and Labor Market Information Section conducted the *2014 OESC Oklahoma Employer Benefit Survey* in the spring of 2014. The following are some of the highlights from this comprehensive benefit survey.

## **Response Rate**

Surveys were mailed to a random sample of 3,910 Oklahoma employers. Of these firms, 1,914 responded for an overall response rate of 49.0%. The highest response rate (69.7%) was reported for Large Other Services firms; the lowest response rate (27.1%) came from Extra Large Financial Activities firms.

## **Firms That Offer Health, Paid Leave or Fringe Benefits**

The survey found that 53,072 (63.6%) Oklahoma firms offered at least one of the following benefits: Health Benefits, Paid Leave or Fringe Benefits. The rate was lower for small firms, as 37,325 (57.4%) offered at least one of these three benefits. The Leisure & Hospitality industry had the lowest number of firms that offered at least one of the benefits with 2,539 (41.1%), and the Other Services industry provided the highest number of firms at 5,249 (85.6%).

## **Firms That Offer Paid Leave Benefits**

Paid leave for employees was provided by 46,876 (56.2%) firms in Oklahoma. Natural Resources and Mining firms most often offered paid leave with 3,105 (77.7%) firms participating. The most frequent type of paid leave offered for most firm sizes and industries was paid holidays, with paid vacation being the second most frequently offered. Salary employees were the most likely to receive paid leave. However, 5,817 (35.2%) small firms offered paid leave to their part-time employees.

### **Firms That Offer Health Benefits**

The larger the firm size, the greater the likelihood of their offering health benefits. However, 1,348 (8.2%) small firms were able to offer health benefits to their part-time employees. The industry most likely to offer health benefits is Financial Activities, with 4,432 (57.2%) firms that offered health benefits. The industry least likely to offer health benefits is Leisure & Hospitality, as 1,428 (23.1%) of their firms provided health benefits.

### **Firms That Pay for a Portion of Employee's Health Benefit Costs**

As one might anticipate, the larger the firm size, the more likely it is to pay a portion of employee Health Benefit Cost. Remarkably, 1,014 (29.1%) small firms reported that they pay a portion of the cost for part-time employees. Natural Resources and Mining was the industry most likely to pay a portion of plan cost, with 2,138 (53.5%) firms reporting this benefit. Leisure & Hospitality was the least likely to pay a portion of cost, as only 1,360 (22.0%) firms offered this benefit.

### **Firms That Discontinued Health Coverage**

Only 3,750 (4.5%) of firms indicated that they have discontinued their Health Coverage. The smaller the firm, the more likely this is to have occurred, with 3,173 (4.9%) small firms no longer offering Health Coverage. However, most all of the firms that discontinued coverage (98.2%) had less than 50 employees. For all firm sizes, 2013 was the year most often reported as the year in which Health Coverage was discontinued. This was most likely to have occurred in the Information industry, where Health Coverage was dropped at 237 (21.8%) firms. Trade, Transportation, and Utilities was the least likely to do so, with only 0.4% of firms discontinued Health Coverage.

### **Firms That Offer Retirement Benefits and Cost**

The larger the firm, the more likely it is to offer retirement benefits. Salary employees are the most likely to be offered Retirement, followed by full-time employees. Only 484 (2.9%) small firms offered retirement to their part-time employees. Information firms are most likely offer Retirement, with 616 (56.5%) firms providing the benefit. Leisure & Hospitality was the industry least likely to offer Retirement, with 739 (12.0%) firms providing the benefit. In reference to Retirement cost, a majority of all firm sizes and industries reported that their cost remained the same.

## Report by Firm Size

Responses to the 2014 OESC Oklahoma Employer Benefit Survey were divided according to four firm sizes: small firms with one to four employees, medium firms with four to 49 employees, large firms with 50 to 249 employees, and extra-large firms with 250 or more employees.

**Question 2** of the survey inquires if the respondent offered health, leave, and fringe benefits.

### Chart 2a: Health, Leave & Fringe Benefits by Firm Size

As firm size increased, so did the likelihood of offering one of these three types of leave.

In **Question 3**, employers were asked about leave benefits for workers.

### Chart 3a. Firms that offer Paid Leave Benefits by Firm Size

**Chart 3a: Firms that offer Paid Leave Benefits by Firm Size** shows that the likelihood of offering one of these types of paid leave increased as firm size increased. Tables 3c, 3e and 3f display the types of leave offered by firm size and employee category.

As shown in Tables 11a, 11b, 11c and 11d, the most frequent health plan change for salary and full-time employees at small and medium firms was “Increased employee's deductibles or co-payments,” while at large and extra-large firms it was “Increased the employee's share of premiums.” No pattern was shown for part-time employees by firm size.

**Question 12** covered whether or not employers had discontinued health benefits.

**Chart 12a. Discontinued Health Benefits by Firm Size**

Chart 12a shows that the likelihood of a firm having discontinued health benefits decreased as firm size increased. Small firms (4.9%) were the most likely to have discontinued benefits.

**Question 13** asked about the year that health benefits were discontinued.

Note: Extra-Large firms = 250+ employees. 160 firms or 74.4% of the survey responding extra-large firms replied to this question. Cell numbers are estimates from weighted responses.

As shown in Tables 15a, 15b, 15c and 15d, employers most frequently contributed half of the funding for defined benefit plans for salary, full-time and part-time employees. This was true for all firm sizes except small firms, where no firms reported providing defined benefit plans for part-time employees.

**Question 16** inquires about any changes in cost of retirement benefits.

As can be seen from Tables 16a, 16b, 16c and 16d, most firms of all sizes had their retirement benefit costs remain the same for all employee groups, except for small firms where no defined benefit plans were reported for part-time employees. However, a substantial portion of firms of all sizes responded that the cost of retirement benefits increased. Small firms reported the largest increase with over 25% of firms seeing a cost increase for salary employees.

In **Question 17**, employers provided more detailed information about how retirement benefits changed.

We see from Tables 17a, 17b, 17c and 17d that “Other” was the most common response for all firm sizes. After “Other”, small firms most often reported a reduction in the total retirement benefit package for salary and full-time employees. Medium and extra-large firms most often reported an increase in the total retirement benefit package for all employee groups. Large firms most often reported an increase in the defined contribution match limit for salary and full-time employees and a decrease in the match limit for part-time employees.

**Question 18** asked if retirement benefit costs affected business for employers.

**Chart 18a: Retirement Cost Affected by Firm Size**

Chart 18a shows that as the size of firms increased, so did the likelihood that the cost of retirement affected their business. Overall, 3.4% of firms reported the cost of retirement affecting their business.

**Question 19** asked what percentage of total personnel compensation costs consists of benefits.

As shown in Table 16e above, salary employee retirement benefits increased in cost during the last 12 months much more often than those for full-time and part-time employees. The costs for most full-time and part-time employee retirement plans usually remained the same for industry firms. Surprisingly, the cost of retirement plans for these two latter employee groups decreased more often than they increased.

In question 17 of this survey, we provided five multiple choice options describing possible changes to retirement plans. Most responding Natural Resources and Mining firms chose “Other” and wrote in their response. Note in table 17e only a few firms responded to this question in the part-time employee category.

**Chart 18b: Retirement Cost Affect by Firm Size and Industry**

Only a few (0.8%) Natural Resources and Mining firms indicated that the cost of retirement benefits had affected their business in the last 12 months. Note the industry differences shown in Chart 18b. Construction (8.4%) and Information (19.3%) led all industries for percent of firms impacted by this type of cost on their businesses.

## Chapter 2: Construction

As was reported in a prior section on benefits offered by firm size, this chapter on Construction similarly portrays responses by employee category. Question 2 of our questionnaire addresses leave, pay, fringe and other benefits offered.

**Chart 2b: Health, Leave & Fringe Benefits by Industry**

**Chart 2b: Health, Leave & Fringe Benefits by Industry** shows that a large percentage of Construction firms (68.7%) offered at least one of these benefits to their employees.

Most Construction firms didn't pay for health plans for the dependents of their employees, as seen in Table 9f. When Construction firms paid a portion of the dependent's health benefit cost, a larger number of them picked up "100%" of the costs for salary and part-time employees. For full-time employees, more firms paid "51% to 75%" of costs.

## Chapter 3: Manufacturing

As was reported in a prior section on benefits offered by firm size, this chapter on Manufacturing will describe responses by employee category. Question 2 of our questionnaire addresses leave, pay, fringe and other benefits offered.

**Chart 2b: Health, Leave & Fringe Benefits by Industry**

**Chart 2b: Health, Leave & Fringe Benefits by Industry** shows that Manufacturing had the third largest percentage of firms (78.3%) that offered at least one of these benefits to their employees.

**Chart 3b: Firms that offer Paid Leave Benefits by Industry**

**Table 3i. Leave benefits offered by Manufacturing.**

Cell numbers are estimates from weighted responses. Multiple responses are possible in each column.

In question 17 of this survey, we provide five multiple choice options describing possible changes to retirement plans. However, as can be seen in Table 17h, most responding Trade, Transportation, and Utilities firms chose “Other” and wrote in their response of change for salary employees. For full-time employees, there was a tie between “Increase the total Retirement benefit package,” and “Other”. Most Trade, Transportation, and Utilities firms indicated that they increased the total retirement benefit package for part-time employees.

**Chart 18b: Retirement Cost Affect by Firm Size and Industry**

Only a few Trade, Transportation, and Utilities firms (1.7%) indicated that the cost of retirement benefits had affected their business in the last 12 months (Chart 18b).

In question 17 of this survey, we provide five multiple choice options describing possible changes to retirement plans. As Table 17j shows, most responding Financial Activities firms chose “Other” and wrote in their response of change for salary employees. Most responding firms reported that they “Reduced the Defined Contribution match limit” for part-time employees. The three most often reported retirement changes for full-time employees were “Increase the total Retirement Benefit package,” “Reduced the Defined Contribution match limit,” and “Increased the Defined Contribution match limit.”

**Chart 18b: Retirement Cost Affect by Firm Size and Industry**

Chart 18b shows that only a small portion Financial Activities firms (1.7%) indicated that the cost of retirement benefits had affected their business in the last 12 months.

## Chapter 9: Other Services

As was reported in the previous section on benefits offered by firm size, this chapter on Other Services will describe responses by employee category. Question 2 of our questionnaire addresses leave, pay, fringe and other benefits offered.

**Chart 2b: Health, Leave & Fringe Benefits by Industry**

**Chart 2b: Health, Leave, & Fringe Benefits by Industry** shows that Other Services was the industry with the largest portion of firms (85.6%) that offered at least one of these benefits to their employees.

**Chart 3b: Firms that offer Paid Leave Benefits by Industry**

**Table 3o. Leave benefits offered by Other Services.**

Note: This table includes Other Services firms with at least one employee. 28 firms or 36.8% of the survey responding Other Services firms replied to this question. Cell numbers are estimates from weighted responses.

In Table 15m, Other Services firms’ salary employees most often contribute the larger share, and full-time employees were most likely to pay an equal share with the firm. The plans for part-time employees were most frequently paid for by the employer alone.

Note: This table includes Other Services firms with at least one employee. 32 firms or 42.1% of the survey responding Other Services firms replied to this question. Cell numbers are estimates from weighted responses.

Other Services firms most frequently responded that the cost of retirement benefits for salary, full-time and part-time employees remained the same during the last 12 months. Table 16m displays that increased plan costs were seen by only 27.4% of firms for salary employees, 16.4% for full-time employees, and 16.8% for part-time employees.

Note: This table includes Other Services firms with at least one employee. 8 firms or 10.5% the survey responding Other Services firms replied to this question. Cell numbers are estimates from weighted responses. Multiple responses are possible in each column.

In question 17 of this survey, we provide five multiple choice options that describe possible changes to retirement plans. However, as revealed in Table 17m, most responding Other Services firms chose “Other” for salary and part-time employees and wrote in their response of change. These write-in responses are examined in Appendix A. For full-time employees, Other Services firms most often choose “Increased the Defined Contribution match limit”.

**Chart 18b: Retirement Cost Affect by Firm Size and Industry**

Only a few Other Services firms (1.4%) indicated that the cost of retirement benefits had affected their business in the last 12 months (Table 18b).

Note: This table includes Other Services firms with at least one employee. 72 firms or 94.7% of the survey responding Other Services firms replied to this question. Cell numbers are estimates from weighted responses.

**Table 19i. Total Benefit Cost by Firm Size and Other Services Industry** shows that the most frequent cost of benefits as a portion of total employee compensation cost was “15% or Less” for small, medium and large firms. For extra-large firms, the most frequent response “More Than 30%” of the total employee compensation package.

## Appendix A. Written Responses

In order to make the 2014 OESC Oklahoma Employer Benefit Survey as comprehensive as possible, respondents were provided with a write-in response category on a number of multiple choice questionnaire items. In some sections such as retirement, this write-in response was the most frequently provided answer for some or all employee categories. Written responses are reported in this appendix. Note that in most cases there were too few responses to allow reporting by firm size or industry.

**Table 3p: Written responses for types of offered paid leave**

Question 3g. Other (Please Specify).		
Types of paid leave	Number	Percent
Bereavement	51	23.6
Pool All Paid Leave	44	20.4
Jury	30	13.9

Anniversary	2	0.9
Incentive	2	0.9
Inclement Weather	2	0.9
<b>Total</b>	<b>216</b>	<b>100.0</b>

Note: Single occurrence written responses were changed to other.

Table 3p shows a total of 16 different written responses to the question about the type of paid leave offered. The three highest in descending rank were “Bereavement” (23.6%), “Pool All Paid Leave” (20.4%), and “Jury” (13.9%).

**Table 4n: Written responses for types of offered pay.**

Question 4f. Other (Please Specify).		
Industries	Number	Percent
Christmas bonus	19	21.8
Annual bonus	12	13.8
Merit raises	12	13.8
Incentive bonus	10	11.5
Profit sharing	9	10.3

Cost of living	2	2.3
Safety Bonus	2	2.3
Shift differential	2	2.3
Other	12	13.8
<b>Total</b>	<b>87</b>	<b>100.0</b>

Note: Single occurrence written responses were changed to other.

The top written responses to questionnaire item 4, as shown in Table 4n, in descending rank are “Christmas bonus” (21.8%), a tie between “Annual bonus” and “Merit raises” (13.8%), and

“Incentive bonus” (11.5%). It’s interesting to note that a number of the written responses were related to merit, production, profit and commission.

**Table 5n: Written responses to types of fringe benefits offered.**

Question 5m. Other (Please Specify).		
<b>Fringe Benefits</b>	<b>Number</b>	<b>Percent</b>
Product or Service Discounts	8	19.5

Tuition	2	4.9
Uniforms	2	4.9
Other	10	24.4
<b>Total</b>	<b>41</b>	<b>100.0</b>

Note: Single occurrence written responses were changed to other.

In Table 5n, the number one written response to the question concerning fringe benefits was “Product or Service Discounts.” One of the provided multiple choice options on this question was “Employee discounts on company products”. It is interesting that this is also a top written response.

**Table 6n: Written responses to types of insurance offered**

Question 6e. Other (Please Specify).		
<b>Industries</b>	<b>Number</b>	<b>Percent</b>

Auto	2	3.0
Home	2	3.0
Legal	2	3.0
I.D.Theft	1	1.5
<b>Total</b>	<b>67</b>	<b>100.0</b>

Table 6n shows that “Cancer” (32.8%) was the most common written response to the question about types of insurance offered to employees. The second most common written response was “Short Term Disability.”

**Table 7p: Written responses for types of health benefits.**

Question 7g. Other (Please Specify).		
Industries	Number	Percent
Critical Illness	4	28.6
Cancer	3	21.4
Health Care Stipend	2	14.3
Motor Club Medical	2	14.3
Diagnostics Screenings	1	7.1
Ill Child Care	1	7.1
Physician Services Free	1	7.1
<b>Total</b>	<b>14</b>	<b>100.0</b>

Note that in Table 7p “Critical Illness” and “Cancer” were the first and second ranked written responses to the question about types of health benefits offered. While “Cancer” was the second most provided health benefit write-in answer, it was the most provided written response in the previous table concerning the types of insurance offered. Some of the written responses are interesting. An example would be the “Motor Club Medical” response. One might wonder if this insurance is limited to company trips, or if it includes personal travel. However, no additional information is available to make this determination.

**Table 11n: Written responses to types of health benefit changes.**

Question 11f. Other (Please Specify).		
Health Benefit Change	Number	Percent
No Change	37	48.1
Increased Employer Share of Cost	6	7.8

Increased Employee Share of Cost	2	2.6
Increased Out-Of-Pocket Maximums	2	2.6
Other	18	23.4
<b>Total</b>	<b>77</b>	<b>100.0</b>

Note: Single occurrence written responses were changed to other.

Table 11n shows that the number one written response to the question about the types of health benefit changes was “No Change” (48.1%). The remainder of responses generally matched some of the provided multiple choice options. Others, such as “Increased Employer Share of Cost,” might be considered to be added as a multiple choice option in the next benefit survey cycle.

**Table 14p Written responses to types of retirement offere**

Question 14g. Other (Please Specify).		
Industries	Number	Percent
Care Plan	1	33.3
Teacher Retirement	1	33.3
Union Pension	1	33.3
<b>Total</b>	<b>3</b>	<b>100.0</b>

Note: Single occurrence written responses were changed to other. Total written responses = 50; 47 of these were duplicates of question selection options.

In Table 14p, only three written response were provided to this question about the types of retirement benefits offered.

**Table 17n: Written responses for retirement changes.**

Question 17f. Other (Please Specify).		
Industries	Number	Percent
No Change	77	82.8
Added Roth Option	2	2.2
Elimintated to new hires	2	2.2
Matched Employee	2	2.2
Switch Companies	2	2.2
Changed Administrator	1	1.1
Discontinued Plan	1	1.1
Eliminated Part-time	1	1.1
Eliminated the Match	1	1.1
Increased Match	1	1.1
Moved From Defined to SEP	1	1.1
Reduced Employer Contribution	1	1.1
Other	1	1.1
<b>Total</b>	<b>93</b>	<b>100.0</b>

In Table 17n, the number one written response to the question on retirement changes was “No Change” (82.8%). The overwhelming number of write-in responses for “No Change” is a definite indication that this should be provided as a multiple choice option the next time this questionnaire is used. Some of the other written responses might also be considered for addition to the survey.

In summary, the most significant information revealed by these written responses is potential improvements that could be incorporated into the survey questionnaire. Of additional significance is the write-in responses for questionnaire item 4 about types of pay offered and questionnaire item 5 about fringe benefits offered. It appears that employers have creatively explored alternative means to reward their most productive employees in response to the recent economic downturn and depressed wages.

## Appendix B. Response Rates

The 2014 OESC Oklahoma Employer Benefit Survey was conducted in the spring of 2014. Surveys were mailed to a random sample of 3,910 Oklahoma employers. The survey return rates are displayed by firm size and industry in the table below.

**Table 1a.** Response by firm size and industry.

	<b>All Industries &amp; All Firm Sizes</b>	<b>1,914</b>	<b>3,910</b>	<b>49.0</b>

Note: Small Firms = 1 to 4 employees, Medium Firms = 5 to 49 employees, Large Firms = 50 to 249 employees, and Extra Large Firms = 250+ employees.

Table 1a shows that 1,914 of the 3,910 surveys mailed out were returned for an overall return rate of 49.0%. The highest response rate (69.7%) was reported for “Large Other Services” firms, while the lowest response rate (27.0%) came from “Extra Large Financial activities” firms. Even small firms had a healthy rate of return (28.3% and greater), and the highest rates of return were most often seen in medium-sized firms.

**Table1b.** Response by firm size.

<b>Firm Size</b>	<b>Response Number</b>	<b>Number in Sample</b>	<b>Response Rate</b>

## Appendix D. Methodology

The Labor Market Information Unit of the Oklahoma Employment Security Commission (OESC) conducted the 2014 OESC Oklahoma Employer Benefit Survey from January 24, 2014, to April 15, 2014. The 3,910-firm sample was taken from a list of state employers in Oklahoma's Covered Employment and Wages (QCEW) database using the Bureau of Labor Statistics' Job Vacancy software. As specified earlier, 1,914 firms responded for a response rate of 49.0%. The distribution of these responses is given in Table 1a in Appendix B.

The sample parameters and returns rates are specific and significant enough to allow a two-digit NAICS industry analysis, a four-size firm analysis, and an analysis by number and percentage of employees represented for each questionnaire item. However, due to time and economic restraints, this report contains only number and percentage of firms as reported by nine Super Sector Industries and the four firm sizes as described and defined in Appendix C. More specific reports, using an analysis of a limited section of this data, may be available upon formal request, if agency time and economic resources allow.

The methodology used in the analysis and report on the gathered data varies on each questionnaire item. The specific method use on each question was determined by the manner firms commonly offer that particular benefit and the anticipated needs of our expected audience. Some items are analyzed and reported by the total number and percentage of the total firms that responded to the question. Others are analyzed and reported by the number and percentages of the total firms in the firm size or total in the industry category. Where possible, results are also given by employee category. In order to clearly identify which method was used for the item, brief and clear notes are given at the bottom of each table or chart.

Employers had the option of replying by mail, fax, e-mail, telephone or online at our website. The survey questionnaire was four pages in length and contained 20 questions. Data from respondents were weighted in order to estimate the number and percentage of Oklahoma employers offering each benefit to Oklahoma salaried employees, full-time hourly employees and part-time hourly employees. Responding firms reported a combined workforce of 249,736 employees, or 20.4% of the employees in Oklahoma's workforce.

It is important to note the limitations of this survey analysis and report. First, the sample and report only include the firms in the Agriculture sector that qualified for Oklahoma unemployment insurance coverage. Federal, state and local government entities are also not included, since most of their benefit information is readily available elsewhere. Every effort is made throughout this report to make the methods of analysis according to professionally accepted standards, with clear and concise explanations. However, if one has questions, please refer to the phone numbers listed on the title page of this report. It is important to note that in each Table 13b-13j, throughout the report, we eliminated the years (2006-2008) due to no response.
