About this publication

Long-term industry and occupational employment projections are developed on a two-year schedule funded by the U.S. Employment and Training Administration (ETA). State analysts have been provided with guidelines, training and technical support for producing these projections. Forecasts were created using the Projections Suite developed by the Utah Department of Employment Security.

Industry employment projections

Oklahoma industry employment projections are developed using the methodology, software tools and guidelines developed by the Projections Workgroup and the Projections Managing Partnership.

The primary methods of analysis for these projections were linear regression and shift-share analysis. Statewide data for some industries is projected at the three-digit level of the North American Industry Classification System (NAICS), while other data is forecast at the four-digit level.

Historical data for Oklahoma comes from the Quarterly Census of Employment and Wages (QCEW) program. Agriculture and non-covered employment data used in industry projections are taken from the American Community Survey and Current Employment Statistics (CES) program. Data for self-employed and unpaid family workers (SE & UFW, primary job) is produced from a projection matrix system based on Oklahoma's OES (Occupational Employment Statistics) survey and BLS Current Population Survey.

The goods-producing industries group is composed of the following supersectors (including the supersector's component industries, if applicable): **natural resources & mining** (agriculture, mining), **construction** and **manufacturing**. The serviceproviding industries group includes **trade**, **transportation & utilities** (transportation & warehousing, wholesale trade, retail trade, utilities); **information**; **financial activities** (finance & insurance; real estate & rental & leasing); **professional & business services** (professional, scientific & technical services; management of companies & enterprises; administrative & support & waste management & remediation services); **educational & health services** (educational services; health care & social assistance); **leisure & hospitality** (arts, entertainment & recreation; accommodation & food services); **other services (except government**); and **government**.

Employment is rounded to the nearest ten. Percent changes are based on unrounded data.

Occupational employment projections

The occupational projections reflect the 2000 Standard Occupational Classification (SOC) system, which classifies more than 700 occupations. Current employment refers to the estimated annual employment by occupation for all industries based on 2006 data. Projected employment refers to the expected annual employment by occupation based on projections made for all detailed industries in Oklahoma. Average annual openings are job openings resulting from growth in an occupation and replacement needs in that occupation. Employment is rounded to the nearest ten. Percentage changes are based on un-rounded data and reflect the percent growth or decline in an occupation over the 10-year period. Education and training attainment refers to the minimum general education or training requirements for each occupation. These requirements may change based on the career ladder for each occupation.

Data limitations

Forecasting the future is not an exact science. Projections are the result of careful analysis of available data. One limitation is that projections do not reflect what might happen under different conditions. International, national and local events can have significant impacts on Oklahoma's economy. Moreover, the projection model does not take into account factors such as immigration, occupational supply, business relocation, emerging new occupations, and industrial or scientific developments.

Please do not use these projections as your sole source of information.

INDUSTRY PROJECTIONS

Service-providing industries continue to drive state job growth

- Oklahoma is expected to add more than 174,000 jobs between 2006 and 2016 across all industries, an increase of over 10 percent.
- Nearly three of every five new jobs added during the 2006-to-2016 period will come from one of the following three supersectors:
 - Educational & health services
 - Professional & business services
 - Leisure & hospitality

- Only one supersector, **manufacturing**, will drop jobs during the projection period. This supersector, along with **natural resources & mining** and **construction**, makes up the goodsproducing industries group.
- The service-providing industries group will contribute more than 85 percent of all job growth between 2006 and 2016.

TABLE 1: OKLAHOMA EMPLOYMENT PROJECTION by INDUSTRY, 2006-2016

| INDUSTRY | EMPLO 2006 | YMENT 2016 | CHA Jobs | NGE Pct. | SH/ 2006 | ARE 2016 |

| Government | 163,840 | 179,550 | 15,710 | 9.59% | 9.71% | 9.65% |

Oklahoma's economy: a snapshot

The Oklahoma economy has seen considerable change over the past few decades. After reporting strong growth throughout the 1970s, the state economy experienced a setback in the 1980s in the form of the oil bust. The state reported net job losses for 1986 through 1988 and again in 1991. The 1990s ushered in a recovery period, as Oklahoma's economy began gaining back the jobs lost over the previous few years. By 1994, Oklahoma had reached the same employment level it held before the losses in the 1980s, and state employment continued to climb, surpassing the 1.6 million mark in 2000. The recession that began in 2001 restricted growth to a degree, but state employment again reached an all-time high in 2004 and continued to climb through 2005 and 2006.

Although Oklahoma's economy is expanding, it's difficult to predict all of the factors that will impact the state during the 2006-to-2016 projection period.

-50,000

A few we already know. Oklahoma, like all other states and the United States as a whole, is changing from a goods-producing economy to a service-providing economy, and the types of jobs available will reflect this change. The aging baby boomer generation will require a larger and better staffed health care industry. Constantly improving technology will provide employers with options to human workers. The oil and gas industry will continue to be an important player in the economic well-being of the state.

Our forecast calls for Oklahoma to add nearly 175,000 jobs between 2006 and 2016, an increase of more than 10 percent. Although this should be considered strong growth, it falls short of the 193,000 jobs added during the 1996-to-2006 time period. Please note that this past 10-year period covered the economic recession that began in 2001, an event that slowed growth.

300,000 250,000 Projected change (jobs) 200.000 150,000 100,000 50,000 0 1988 * 1990 * 1992 * 1994 * 1996 * 1998 * 2000 * 2002 * 2004 * 2006 * 2016

CHART 1: 10-YEAR CHANGE in OKLAHOMA NONFARM EMPLOYMENT, 1988-2006 & 2016 FORECAST

End of 10-year period

* Historical data taken from Current Employment Statistics (CES) program

Overview

The three supersectors expected to account for most of the state's job growth are **educational & health services**, **professional & business services**, and **leisure & hospitality**. When combined, these three supersectors will account for nearly 60 percent of all job growth over the 2006-to-2016 projection period.

The educational & health services supersector is expected to add more than 48,000 jobs during the projection period. Educational services will produce 18,580 new jobs, while health services will add 29,690 jobs. The health services growth will be spread across all four of its component industries (ambulatory health care services, hospitals, nursing & residential care facilities, and social assistance). This growth is the result of the gradually aging population and its increased future health care needs coupled with advances in new technologies that increase life expectancies.

Professional & business services is projected to gain over 34,000 jobs between 2006 and 2016. This large gain will result in a job growth rate of more than 19 percent, the highest among all supersectors. The **professional, scientific & technical services** and **administrative & support**

services industries will provide all of the supersector's growth during the period, as management of companies & enterprises sheds jobs. The catalyst for this growth will be business demand for sophisticated computer networks, technological solutions to current business challenges, and a variety of employment services to address complex business issues.

Leisure & hospitality is expected to grow by more than 21,000 jobs between 2006 and 2016. The accommodation & food services industries will provide more than four out of every five jobs gained during the projection period, driven almost entirely by food services & drinking places. Amusement, gambling & recreation industries will contribute much of the rest of the growth seen in leisure & hospitality. The continued growth of tribal casinos and resorts is expected to be a driving force for this supersector.

Although **trade, transportation & utilities** is expected to add the fourth largest total of new jobs, the supersector's growth rate is below the state's projected overall job growth rate of 10.33 percent. Movement in **retail trade** will provide more than half of the growth, driven mostly by

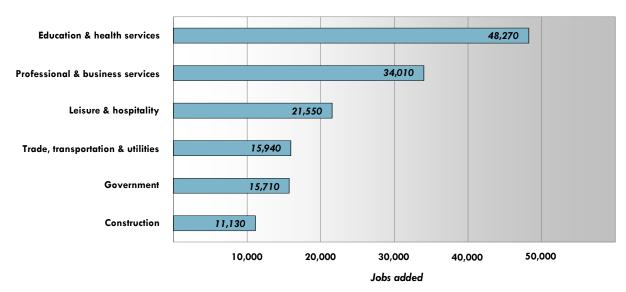

CHART 2: SUPERSECTORS with MOST EXPECTED JOB GROWTH, 2006-2016

job gains in **general merchandise stores**. Wholesale trade industries will contribute 3,900 jobs of the growth, with transportation & warehousing making up the remaining 3,800 jobs. The factor that will most affect this supersector is technological innovation, such as electronic data exchange to help track product information, radio frequency identification that streamlines distribution, and electronic commerce options.

Government employment is expected to grow by more than 15,000 jobs between 2006 and 2016. **Local government, excluding education & hospitals** is expected to account for 12,550 new jobs during the period. Growth in **state government** and **local government** will be driven by public education demands and the increasing need to augment community, health and protective services once provided to a greater degree by the federal government.

Construction will expand at a faster rate than the overall job market, growing by 11,130 jobs, or 15.81 percent, between 2006 and 2016. Although all of its industries will expand over the period, the **specialty trade contractors** industry is expected to provide a majority of the job growth. Construction projects expected to help drive growth include nursing homes, medical treatment facilities and schools.

Financial activities is expected to expand by nearly 9 percent with a gain of 7,470 jobs for the period. Although all industries are expected to add jobs, **credit intermediation & related activities** and **rental & leasing services** will lead the way. **Natural resources & mining** will grow by more than 5,600 jobs, or 7.62 percent, during the projection period. Employment gains will be due almost entirely to **support activities for mining**, an industry that will add more than 4,500 jobs between 2006 and 2016. This growth will be due to Oklahoma's strong oil and natural gas industry. Nationally, this supersector is expected to shed more than 10,000 jobs over the projection period.

Other services (except government) will add more than 5,500 jobs during the forecast period, a gain of nearly 9 percent. More than 40 percent of the growth will come from the **repair & maintenance** industry. The only industry losing jobs for the period will be **private households**.

Information is expected to expand the least between 2006 and 2016, growing by just over 2,000 jobs. **Telecommunications**, the supersector's dominant industry, is expected to contribute more than 1,800 jobs.

The only supersector expected to lose jobs over the forecast period is **manufacturing**, which will contract by 730 jobs between 2006 and 2016. However, this small loss is not representative of the changes taking place within the **manufacturing** supersector. While a large number of jobs will be lost from industries such as **printing & related support activities**, other industries, like **food manufacturing**, will post solid growth between 2006 and 2016. The overall outlook for **manufacturing** is continuing demanddriven growth coupled with productivity-led employment declines.

Industry forecasts

Growth industries

Between 2006 and 2016, the 10 industries reporting the largest number of jobs gained will account for nearly 70 percent of all jobs added. These industries, known as **growth industries**, cover a variety of disciplines, including health services, professional services and hospitality.

The industry expected to add the most jobs is administrative & support services. This industry will expand by more than 19,000 jobs during the period. Administrative & support services includes areas such as employment services, business support services and services to buildings.

Next on the list of top 10 growth industries is educational services, an industry expected to expand by more than 18,500 jobs during the period. Factors affecting this industry will be an increased number of jobs at post-secondary and professional schools, added emphasis on structured activities for children, and anticipated educational reforms. Following closely behind with an addition of 16,160 jobs will be the **food services & drinking places** industry. Growth is expected to result from an aging population that desires more convenient dining options.

Professional, scientific & technical services is projected to expand by 14,470 jobs, and **local government, excluding education & hospitals** will add more than 12,500 jobs. **Specialty trade contractors** is the only goods-producing industry in the top 10 growth industries for the 2006-to-2016 period.

Of the top 10 industries to add the most jobs, three are classified as **health services** industries: **hospitals**, **ambulatory health care**, and **nursing & residential care facilities**. These industries will combine to account for 23,610 new jobs between 2006 and 2016. When combined with **educational services**, the other component of the **educational & health services** supersector, these industries will provide nearly one-quarter of the jobs gained over the projection period.

| INDUSTRY | EMPLC | YMENT | CHANGE | | |
|---|---------|---------|--------|--------|--|
| | 2006 | 2016 | Jobs | Pct. | |
| Administrative & support services | 98,740 | 117,760 | 19,010 | 19.25% | |
| Educational services | 157,250 | 175,830 | 18,580 | 11.82% | |
| Food services & drinking places | 110,340 | 126,500 | 16,160 | 14.64% | |
| Professional, scientific & technical services | 61,450 | 75,910 | 14,470 | 23.54% | |
| Local government, excluding education & hospitals | 79,840 | 92,390 | 12,550 | 15.72% | |
| Specialty trade contractors | 43,820 | 52,410 | 8,590 | 19.61% | |
| Hospitals | 63,490 | 71,890 | 8,400 | 13.23% | |
| Self-employed workers, primary job | 113,700 | 121,580 | 7,880 | 6.93% | |
| Ambulatory health care services | 61,200 | 68,900 | 7,700 | 12.58% | |
| Nursing & residential care facilities | 34,370 | 41,880 | 7,510 | 21.84% | |

TABLE 2: OKLAHOMA'S TOP 10 GROWTH INDUSTRIES, 2006-2016 (INDUSTRIES with MOST PROJECTED GROWTH)

Rapid growth industries

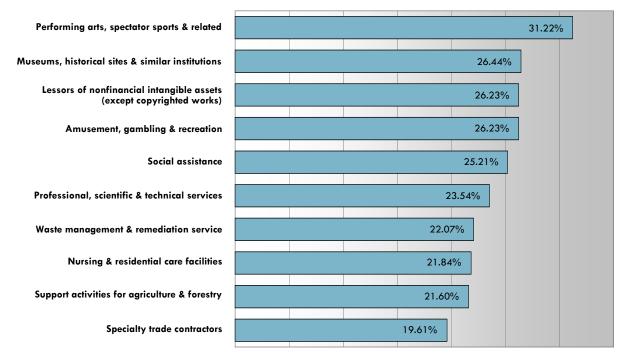

Rapid growth industries are those that report the largest percentage growth over the projection period. When looking at rapid growth industries, it is important to remember that they fall into one of two general categories. The first is made up of industries with a small number of jobs. Any growth in this type of industry will appear significant. For example, in an industry with 100 jobs, a gain of 10 jobs would represent a growth rate of 10 percent. However, an industry with 100,000 jobs would have to gain 10,000 jobs to achieve the same growth rate. The other category is made up of these larger industries. Because of the large number of jobs, the gain of a few jobs will affect the growth rate much less than in a small industry.

Three of the four industries with the highest growth rates (**performing arts, spectator sports** & related industries; museums, historical sites & similar institutions; and amusement, **gambling & recreational industries**) are recreation-related industries.

Other small industries represented among the top 10 rapid growth industries include **lessors of nonfinancial intangible assets (except copyrighted works), waste management & remediation services,** and **support activities for agriculture & forestry.**

Three industries classified as growth industries also made the list of top 10 rapid growth industries: **professional, scientific & technical services; nursing & residential care facilities;** and **specialty trade contractors**. All three of these industries fall into the large industry category and, when combined, are the source of more than 70 percent of the new jobs provided by the top 10 rapid growth industries. The fourth large industry on the list, **social assistance**, is expected to grow the fastest among the larger industries.

CHART 3: OKLAHOMA'S TOP 10 RAPID GROWTH INDUSTRIES, 2006-2016 (INDUSTRIES with the FASTEST GROWTH)

Growth

Declining industries

While many industries are expected to add jobs between 2006 and 2016, there are those that will do the opposite. These are known as **declining industries**. All of the industries represented in the top 10 declining industries belong to the serviceproviding industries. All told, the top 10 declining industries will shed a total of 6,780 jobs between 2006 and 2016.

Manufacturing industries make up six of the top 10 declining industries, with **printing & related support activities** expected to lead all industries with a projected loss of 1,110 jobs. Other

manufacturing industries making the list were transportation equipment manufacturing, apparel manufacturing, plastics & rubber products manufacturing, paper manufacturing, and computer & electronic product manufacturing.

Three industries that fall under trade, transportation & utilities (miscellaneous store retailers, utilities, and nonstore retailers), were also included on the list. The remaining spot was claimed by motion picture & sound recording industries.

TABLE 2: OKLAHOMA'S TOP 10 DECLINING INDUSTRIES, 2006-2016 (INDUSTRIES with MOST PROJECTED LOSSES)

| NDUSTRY | EMPLO | YMENT | CHANGE | |
|---|--------|--------|--------|---------|
| | 2006 | 2016 | Jobs | Pct. |
| Printing & related support activities | 3,980 | 2,870 | -1,110 | -27.92% |
| Transportation equipment manufacturing | 16,510 | 15,640 | -870 | -5.25% |
| Miscellaneous store retailers | 11,030 | 10,190 | -840 | -7.63% |
| Apparel manufacturing | 1,090 | 430 | -660 | -60.57% |
| Plastics & rubber products manufacturing | 12,640 | 12,000 | -640 | -5.04% |
| Utilities | 9,910 | 9,290 | -620 | -6.28% |
| Paper manufacturing | 2,870 | 2,250 | -620 | -21.62% |
| Nonstore retailers | 2,290 | 1,750 | -540 | -23.54% |
| Motion picture & sound recording industries | 1,600 | 1,110 | -490 | -30.39% |
| Computer & electronic product manufacturing | 5,810 | 5,430 | -390 | -6.67% |

OCCUPATIONAL PROJECTIONS

Service occupations will lead growth through 2016

Oklahoma is expected to continue to grow during the projection period. Between 2006 and 2016, statewide occupational employment will expand by 174,240 jobs, or 10.3 percent. Although this is down from the 11.9 percent growth rate projected for the 2004-to-2014 period, it will still result in an average of more than 17,000 new jobs each year. One major occupational division, service occupations, is expected to provide the largest number of jobs, the largest percent change and the

most openings per year. Second place in each of these categories will be claimed by either professional & related occupations or construction & extraction occupations. These two divisions join **service occupations** as the only occupational divisions to increase their share of total employment over the 2006-2016 projection period. All major occupational divisions are expected to expand between 2006 and 2016.

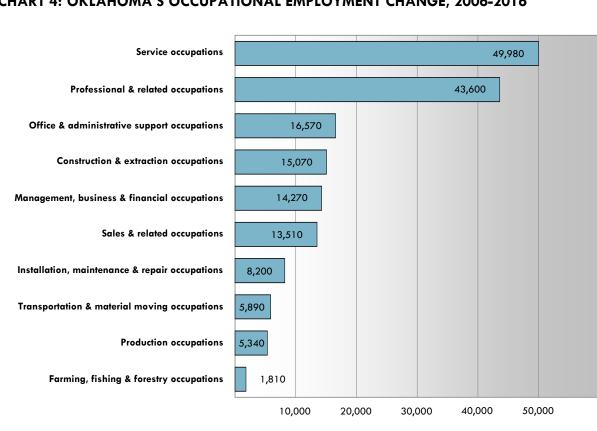

CHART 4: OKLAHOMA'S OCCUPATIONAL EMPLOYMENT CHANGE, 2006-2016

Jobs added

Occupational forecasts

Two major occupational divisions, **service occupations** and **professional & related occupations**, are expected to provide more than half of all jobs gained over the forecast period. These two divisions will also be the source of more than two out of every five jobs added each year between 2006 and 2016.

Service occupations

The **service occupations** group is expected to add nearly 50,000 new jobs during the projection period, the most of any major occupational division. The division is also expected to post the highest growth rate and add the most jobs each year among the major occupational divisions.

Health care and food service occupations are projected to be among the leading growth occupations in this group. **Combined food preparation & serving workers, including fast food; personal & home care aides; waiters & waitresses;** and **nursing aides, orderlies &** **attendants** are all expected to grow by more than 3,500 jobs between 2006 and 2016.

Professional & related occupations

Following right on the heels of **service occupations** will be **professional & related occupations**. This major division is expected to post a similar job gain and growth rate as **service occupations**, but will provide nearly 1,900 fewer jobs per year on average.

This group's growth will be provided primarily through health care and educational occupations. The three professional & related occupations projected to add the largest average number of jobs each year between 2006 and 2016 are **registered nurses**; **postsecondary teachers**; and **elementary school teachers**, **except special education**. These three occupations will contribute more than onequarter of all jobs gained by **professional & related occupations** during the projection period.

| Transportation & material moving | 112,070 | 117,960 | 6.64% | 6.34% | 5,890 | 5.26% | 3,290 | | |

Office & administrative support occupations

Office & administrative support occupations is a group in flux. It will grow by more than 16,500 jobs between 2006 and 2016, the third largest amount of any occupational group, and contains one-fifth of the 30 occupations expected to provide the most average job openings per year. Despite these facts, 12 of the 30 declining industries, or industries with the largest expected declines over the period, also originate from this group. **Customer service representatives** are expected to add an average of more than 1,200 jobs each year. Over the same period, file clerks and stock clerks & order fillers will each average losses of at least 1,000 jobs per year.

Construction & extraction occupations

Construction & extraction occupations will expand by more than 15,000 jobs during the 2006to-2016 period, giving it the second highest growth rate among occupational groups. Much of the anticipated growth will come from construction occupations. **Roofers** is expected to be one of the 30 fastest growing occupations, while **construction laborers** will make the list of 30 occupations with the largest number of new jobs.

Management, business & financial occupations

Management, business & financial occupations will see an increase of 14,270 jobs for the period. This group placed in the middle of all occupational groups when ranked for numeric change, percent change and average annual openings between 2006 and 2016. General & operations managers and accountants & auditors are both expected to post notable growth. When combined, these occupations will provide one of every four jobs classified under management, business & financial occupations in 2016.

Sales & related occupations

Sales & related occupations will continue to expand, posting a gain of more than 13,000 jobs over the period. This expansion will be driven by continued growth in retail trade. **Retail** salespersons, the occupation with the largest employment of all occupations, joins cashiers and first-line supervisors/managers of retail sales workers as one of the 30 occupations with the most openings and one of the 30 expected to average the most jobs each year.

Installation, maintenance & repair occupations

Installation, maintenance & repair occupations are expected to add 8,200 jobs by 2016. **Maintenance & repair workers, general**, expected to be one of the 30 occupations with the largest employment in 2016, will account for more than one-fifth of the jobs gained by **installation**, **maintenance & repair occupations** between 2006 and 2016.

Transportation & material moving occupations

Although transportation & material moving occupations is projected to expand over the period, its growth rate will be the second lowest among the major occupational groups. Two of this group's occupations, laborers & freight, stock & material movers, hand and truck drivers, heavy & tractor-trailer, are among the 30 occupations with the most employment and the 30 occupations expected to average the most jobs each year.

Production occupations

Production occupations will post the smallest growth rate of all occupational groups between 2006 and 2016. Although **team assemblers** will do well over the projection period, fully one-third of the 30 occupations expected to shed the most jobs belong to this group. Many of these losses are driven by the increased use of automated machinery by manufacturers and rising imports of manufactured goods.

Farming, fishing & forestry occupations

Farming, fishing & forestry occupations is the smallest occupational group. In 2006, this group

provided less than 1.5 percent of all jobs. That number is expected to decrease by 2016. Despite the anticipated contraction, **farmworkers & laborers, crop, nursery & greenhouse** will continue to be one of the occupations with the largest employment.

Job openings: growth vs. replacement

There are two basic types of job openings. Some openings are created when a business opens or grows. These are referred to as growth openings. Other job openings, known as replacement openings, are created when workers leave their occupations. Reasons may include retirement or a change in occupations. Changing employers while staying in the same occupation does not constitute a replacement opening. Whether a business has a growth opening or a replacement opening, a new worker is needed. By looking at the average number of annual job openings, one can get a good indication of how many new workers will be needed each year to fill these openings.

For the 2006-to-2016 time span, nearly one-third of all job openings will be growth openings, with replacement openings making up the rest. The **farming, fishing & forestry occupations** division is expected to produce the fewest growth openings and will have the lowest percentage of growth openings compared to all job openings. The **service occupations** division is expected to provide the largest number of both growth openings and replacement openings during the period.

Where is the most demand?

From 2006 to 2016, the 30 occupations with the most projected job openings per year, also known as demand occupations, will represent nearly 40 percent of total employment and provide an average of more than two out of every five job openings each year. **Retail salespersons** and **cashiers**, two **sales & related occupations**, will provide the most job openings per year between

2006 and 2016, averaging 2,160 jobs per year and 2,020 jobs per year, respectively. Although **sales & related occupations** claimed the top two spots on the list, **service occupations** contributed eight of the top 30 demand occupations, followed by **office & administrative support occupations** (7) and **professional & related occupations** (6).

| (OCCOLATIONS WITH EAROEST NOMBER O | | | | • |
|--|------------|---------------|---------------|-------------------------------|

TABLE 5: OKLAHOMA'S TOP 30 DEMAND OCCUPATIONS, 2006-2016 (OCCUPATIONS with LARGEST NUMBER of OPENINGS PER YEAR)

Where is the most growth?

Oklahoma employment is expected to grow by more than 10 percent between 2006 and 2016. The 30 occupations predicted to grow at the fastest rates during the period, or growth occupations, all more than double this growth rate. **Professional** & related occupations are expected to make up nearly half of these growth occupations between 2006 and 2016. **Service occupations** will provide 10 of the remaining growth occupations. Two of the top three growth occupations are related to veterinary medicine. Three growth occupations are concerned with the information technology field, while four others work in the gaming industry.

| OCCUPATION | EM | AVERAGE ANNUAL | | |
|--|--------|-------------------|--------|----------|
| OCCUPATION | 2006 | 2016 | Growth | OPENINGS |
| Veterinary technologists & technicians | 620 | 940 | 51.61% | 60 |
| Network systems & data communications analysts | 2,090 | 3,090 | 47.85% | 150 |
| Veterinarians | 800 | 1,140 | 42.50% | 50 |
| Computer software engineers, applications | 2,180 | 3,030 | 38.99% | 120 |
| Personal & home care aides | 11,070 | 15,320 | 38.39% | 620 |
| Gaming surveillance officers & gaming investigators | 330 | 450 | 36.36% | 20 |
| Gaming & sports book writers & runners | 510 | 680 | 33.33% | 30 |
| Home health aides | 7,510 | 10,000 | 33.16% | 320 |
| Pharmacy technicians | 3,690 | 4,890 | 32.52% | 240 |
| Forensic science technicians | 130 | 170 | 30.77% | 10 |
| Gaming supervisors | 390 | 510 | 30.77% | 20 |
| Gaming dealers | 750 | 980 | 30.67% | 40 |
| Slaughterers & meat packers | 2,160 | 2,810 | 30.09% | 140 |
| Criminal justice & law enforcement teachers, postsecondary | 100 | 130 | 30.00% | 10 |
| Surveyors | 470 | 610 | 29.79% | 30 |
| Library science teachers, postsecondary | 70 | 90 | 28.57% | 10 |
| Industrial engineers | 1,440 | 1,840 | 27.78% | 80 |
| Security & fire alarm systems installers | 1,030 | 1,310 | 27.18% | 50 |
| Manicurists & pedicurists | 150 | 190 | 26.67% | 10 |
| Correctional officers & jailers | 5,510 | 6,970 | 26.50% | 280 |
| Sales representatives, services, all other | 3,610 | 4,560 | 26.32% | 180 |
| Biochemists & biophysicists | 230 | 290 | 26.09% | 20 |
| Computer systems analysts | 3,650 | 4,570 | 25.21% | 190 |
| Political science teachers, postsecondary | 160 | 200 | 25.00% | 10 |
| Animal trainers | 520 | 650 | 25.00% | 30 |
| Airfield operations specialists | 120 | 150 | 25.00% | 10 |
| Meat, poultry & fish cutters & trimmers | 1,050 | 1,310 | 24.76% | 60 |
| Nonfarm animal caretakers | 2,110 | 2,630 | 24.64% | 90 |
| Roofers | 1,180 | 1,470 | 24.58% | 60 |
| Customer service representatives | 23,590 | 29,370 | 24.50% | 1,240 |

TABLE 6: OKLAHOMA'S TOP 30 GROWTH OCCUPATIONS, 2006-2016 (OCCUPATIONS with LARGEST PERCENT GROWTH)

Where is the biggest decline?

Unfortunately, not all occupations will expand over the projection period. Occupations that lose jobs over time are called declining occupations. Of the top 30 declining occupations between 2006 and 2016, the largest projected loss will be seen in **file clerks**, which will drop nearly 1,200 job openings over the period. Twelve of the top 30 declining occupations belong to the **office & administrative support occupations** division. Ten more declining occupations are classified as **production occupations**. These projections reflect a world in which technology is reducing the office workload and an economy that is becoming service-based rather than goods-based.

TABLE 7: OKLAHOMA'S TOP 30 DECLINING OCCUPATIONS, 2006-2016 (OCCUPATIONS with LARGEST LOSSES)

| OCCUPATION | | YMENT | CHANGE | | |
|---|--------|--------|--------|---------|--|
| | 2006 | 2016 | Number | Pct. | |
| File clerks | 2,730 | 1,540 | -1,190 | -43.59% | |
| Stock clerks & order fillers | 16,990 | 15,990 | -1,000 | -5.89% | |
| Packers & packagers, hand | 6,590 | 5,820 | -770 | -11.68% | |
| Order clerks | 2,620 | 1,900 | -720 | -27.48% | |
| Telemarketers | 6,010 | 5,560 | -450 | -7.49% | |
| Computer programmers | 3,600 | 3,250 | -350 | -9.72% | |
| Sewing machine operators | 1,530 | 1,200 | -330 | -21.57% | |
| Electrical & electronic equipment assemblers | 1,770 | 1,470 | -300 | -16.95% | |
| Computer operators | 1,120 | 840 | -280 | -25.00% | |
| Data entry keyers | 3,110 | 2,850 | -260 | -8.36% | |
| Switchboard operators, including answering service | 2,210 | 1,970 | -240 | -10.86% | |
| Secretaries, except legal, medical & executive | 26,070 | 25,850 | -220 | -0.84% | |
| Mail clerks & mail machine operators, except postal service | 1,560 | 1,340 | -220 | -14.10% | |
| Information & record clerks, all other | 1,960 | 1,750 | -210 | -10.71% | |
| Parts salespersons | 3,430 | 3,230 | -200 | -5.83% | |
| New accounts clerks | 1,100 | 910 | -190 | -17.27% | |
| Tire builders | 1,420 | 1,230 | -190 | -13.38% | |
| Postal service mail sorters, processors & processing machine operators | 1,850 | 1,670 | -180 | -9.73% | |
| Bindery workers | 620 | 480 | -140 | -22.58% | |
| Driver/sales workers | 6,510 | 6,370 | -140 | -2.15% | |
| Meter readers, utilities | 1,020 | 900 | -120 | -11.76% | |
| Lathe & turning machine tool setters, operators & tenders, metal & plastic | 860 | 740 | -120 | -13.95% | |
| Paper goods machine setters, operators & tenders | 680 | 560 | -120 | -17.65% | |
| Pharmacy aides | 1,010 | 890 | -120 | -11.88% | |
| Prepress technicians & workers | 550 | 440 | -110 | -20.00% | |
| Radio & television announcers | 700 | 590 | -110 | -15.71% | |
| Machine feeders & offbearers | 990 | 880 | -110 | -11.11% | |
| Forging machine setters, operators & tenders, metal & plastic | 520 | 420 | -100 | -19.23% | |
| Cutting, punching & press machine setters, operators & tenders, metal & plastic | 3,510 | 3,410 | -100 | -2.85% | |
| Drilling & boring machine tool setters, operators & tenders, metal & plastic | 800 | 700 | -100 | -12.50% | |

Education/training requirements

Education and training requirements for job openings can be divided into 11 categories: short term on-the-job training, moderate term on-the-job training, long term on-the-job training, work experience in a related occupation, postsecondary vocational training, associate degree, bachelor's degree, bachelor's or higher degree plus work experience, master's degree, first professional degree, and doctoral degree. Definitions for these categories are included in the explanation of the educational attainment category.

Occupations are classified into one of these 11 categories according to the following principles.

• An occupation is placed into the category that best describes the education or training needed by most workers to become fully qualified.

- Postsecondary awards, if generally needed for entry into the occupation, take precedence over work-related training even though additional skills or experience may be needed for a worker to become fully qualified.
- The length of time an average worker generally needs to become fully qualified through on-thejob training and experience is used to categorize occupations in which a postsecondary award generally is not needed for entry.

For more information about the categories, see *Occupational Projections and Training Data*, *2008-09 edition*, Bulletin 2702 (Bureau of Labor Statistics, February 2008) at http://www.bls.gov/emp/optd/optd.pdf.

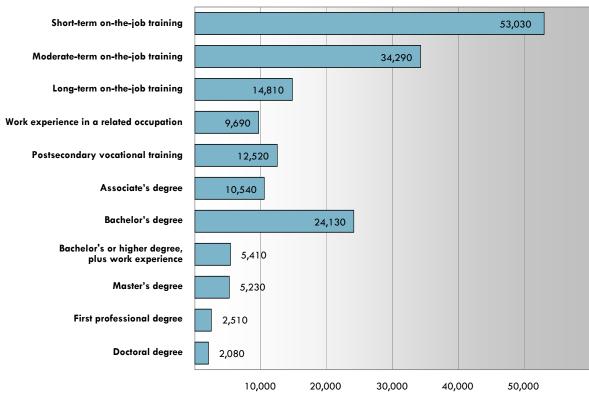

CHART 5: OKLAHOMA'S OCCUPATIONAL EMPLOYMENT CHANGE by EDUCATION/ TRAINING, 2006-2016

Jobs added

Projections by education/training

In 2006, more than 70 percent of job openings did not require postsecondary education. These openings required only work experience in a related field or on-the-job training. By 2016, this number is expected to drop to just below 70 percent. All activities necessary to do the jobs that require on-the-job training can be learned while working in the occupation. The four occupations requiring only work experience in a related field or on-the-job training with the highest growth rates are all service occupations: **personal & home care aides, gaming surveillance officers & gaming**

investigators, gaming & sports book writers & runners, and home health aides.

This movement means that the share of job openings requiring some level of postsecondary education or training will increase from just below to just above 30 percent of all job openings. Of the 30 occupations requiring some level of postsecondary education or training with the fastest growth rates, 26 are classified as **professional & related** occupations.

TABLE 8: OKLAHOMA EMPLOYMENT PROJECTION by EDUCATION/TRAINING, 2006-2016

| EDUCATION/TRAINING CATEGORY | EMPLO 2006 | YMENT 2016 | DISTRIE 2006 | 3UTION 2016 | CHA Jobs | NGE Pct. | AVERAGE ANNUAL OPENINGS |
|--|---------------|---------------|-----------------|-----------------------|-------------|-------------|-------------------------------|
| TOTAL, all occupations | 1,687,270 | 1,861,510 | 100.00% | 100.00% | 174,240 | 10.33% | 56,200 |
| Short-term on-the-job training | 587,520 | 640,550 | 34.82% | 34.41% | 53,030 | 9.03% | 22,490 |
| Moderate-term on-the-job training | 363,800 | 398,090 | 21.56% | 21.39% | 34,290 | 9.43% | 10,680 |
| Long-term on-the-job training | 117,780 | 132,590 | 6.98% | 7.12% | 14,810 | 12.57% | 4,090 |
| Work experience in a related occupation | 114,180 | 123,870 | 6.77% | 6.65% | 9,690 | 8.49% | 3,160 |
| Postsecondary vocational training | 105,320 | 117,840 | 6.24% | 6.33% | 12,520 | 11.89% | 3,050 |

| Bachelor's degree | 176,320 | 200,450 | 10.45% | 10.77% | 24,130 | 13.69% | 5,760 |
| Bachelor's or higher degree, plus work experience | 92,190 | 97,600 | 5.46% | 5.24% | 5,410 | 5.87% | 2,530 |
| Master's degree | 35,080 | 40,310 | 2.08% | 2.17% | 5,230 | 14.91% | 1,170 |
| First professional degree | 22,940 | 25,450 | 1.36% | 1.37% | 2,510 | 10.94% | 670 |
| Doctoral degree | 10,100 | 12,180 | 0.60% | 0.65% | 2,080 | 20.59% | 360 |

Notes: Glossary

Industry projections

Industry – detailed title for each industry and industry subdivision.

Employment, 2006 – estimated total number of jobs employed in that industry or industry subdivision.

Employment, 2016 – projected total number of jobs employed in that industry or industry subdivision.

Change, jobs – total number of jobs projected to be added or lost during the projection period.

Change, pct. – projected percentage change in employment taking place over the projection period. Percent change is based on the change from the starting amount.

Occupational projections

SOC code – Standard Occupational Classification system code. The SOC system is used by federal agencies to classify workers into one of more than 820 occupations. Each broad occupation includes detailed occupation(s) requiring similar job duties, skills, education, or experience.

Occupation – the title by which an occupation is known in the majority of establishments in which

it is found.

Employment, 2006 – estimated total number of jobs employed in that industry or industry subdivision.

Employment, 2016 – projected total number of jobs employed in that industry or industry subdivision.

Change, jobs – total number of jobs projected to be added or lost during the projection period.

Change, pct. – projected percentage change in employment taking place over the projection period. Percent change is based on the change from the starting amount.

Average annual openings – sum of average annual new jobs and average annual replacements. See Technical Notes, 8.

Average hourly wage – sum of wages earned by all employees in a given occupation divided by the total number of employees in that occupation.

Descriptor – see Technical Notes, 7.

Education attainment – the minimum educational level generally required by employers when hiring for a particular occupation.

Notes: Educational attainment

In the following occupational projection tables, educational attainment is given a value from 1 to 11. Each value represents a different minimum education/training requirement for a particular occupation. These values can be divided into two groups: postsecondary awards and work-related training.

Postsecondary awards

- 1. First professional degree. Completion of the degree usually requires at least three years of full-time academic study beyond a bachelor's degree.
- 2. Doctoral degree. Completion of a Ph.D. or other doctoral degree usually requires at least three years of full-time academic study beyond a bachelor's degree.
- **3.** Master's degree. Completion of the degree usually requires one or two years of full-time academic study beyond a bachelor's degree.
- 4. Bachelor's or higher degree, plus work experience. Most occupations in this category are management occupations. All require experience in a related non-management position for which a bachelor's or higher degree is usually required.
- **5. Bachelor's degree**. Completion of the degree generally requires at least four years, but not more than five years, of full-time academic study.
- 6. Associate degree. Completion of the degree usually requires at least two years of full-time academic study.
- 7. Postsecondary vocational award. Some programs last only a few weeks, while others may last more than a year. Programs lead to a certificate or other award but not a degree.

Work-related training

- 8. Work experience in a related occupation. Many occupations that require work experience are first-line supervisors/managers of service, sales & related, production, or other occupations, or are management occupations.
- 9. Long-term on-the-job training. More than 12 months of on-the-job training or combined work experience and formal classroom instruction are needed for workers to develop the skills necessary to be fully qualified. This category includes formal and informal apprenticeships that may last up to five years. Long-term on-the-job training also includes intensive occupation-specific, employersponsored programs that workers must successfully complete. These include fire and police academies and schools for air traffic controllers and flight attendants. In other occupations (insurance sales and securities sales, for example), trainees take formal courses, often provided on the job site, to prepare for the required licensing exams. Individuals undergoing training generally are considered to be employed in the occupation. Also included in this category is the development of a natural ability (such as that possessed by musicians, athletes, actors and other entertainers) that must be cultivated over several years, frequently in a non-work setting.
- **10. Moderate-term on-the-job training**. Skills needed to be fully qualified can be acquired during one to 12 months of combined on-the-job experience and informal training.
- **11.** Short-term on-the-job training. Skills needed to be fully qualified can be acquired during a short demonstration of job duties or during one month or less of on-the-job experience or instruction.

Notes: Technical notes

- 1. The data contained within this publication represents forecasts of future conditions rather than guaranteed conditions. Any decisions made using this data should be based on the user's own analyses and conclusions.
- 2. Data for occupations estimated to employ less than 50 people in 2006 have not been included.
- 3. Both employment estimates and number of openings have been rounded to the nearest 10.
- 4. Occupational category totals may not calculate exactly as a result of rounding and suppression of data for occupations employing less than 50 people in 2006.
- 5. The data source for the wage information used in this publication is 2007 Oklahoma Occupational Employment and Wage Estimates, available on the Bureau of Labor Statistics website (http://stats.bls.gov/oes/current/oes_ok.htm). Occupations noted in the data tables with * meet one of the following conditions.
 - Workers who generally work less than the usual 2,080 hours per year
 - Workers for whom there is not sufficient data
 - Workers who have no average hourly wage reflected.

Examples of occupations that typically have a work-year of less than 2,080 hours include musical and entertainment occupations; pilots and flight attendants; and teachers.

- 6. Bolded occupations in the **Employment projections by occupation**, 2006-2016 tables are the occupational totals and subtotals.
- 7. Occupations are categorized using a three-letter code (A through D) based on three separate factors. Each letter in the code represents one of these factors. These codes are displayed in the "Descriptor" column in the included tables.
 - The first letter of the descriptor displays the quartile that the occupation fell into when the size of total employment was considered. First quartile occupations, or those that were largest (most jobs), were labeled "A." Occupations in the last quartile were the smallest (fewest jobs) and were labeled "D." Those in the second and third quartiles received a "B" or "C," respectively.
 - The second letter of the descriptor displays what quartile the occupation fell into when the amount of growth from 2006 to 2016 was considered. The rate of growth is defined as the difference between employment totals in 2006 and 2016. First quartile occupations, those that had the most growth (largest change) in employment from 2006 to 2016, received an "A." Occupations in the last quartile (least amount of growth) received a "D." Those in the second and third quartiles received a "B" or "C," respectively.
 - The third letter of the descriptor describes the average wage range into which the occupation falls. The wage categories are based on the wage tables in *2007 Oklahoma Occupational Employment and Wage Estimates*. The four ranges are as follows:
 - **D** occupations with an average hourly wage between \$0.00 and \$11.99.
 - **C** occupations with an average hourly wage between \$12.00 and \$24.49.
 - **B** occupations with an average hourly wage between \$24.50 and \$49.74.
 - A occupations with an average hourly wage of \$49.75 or higher.

As an example, occupation 41-3021 "Insurance Sales Agents" has a descriptor of ABC. The letter "A" means that the occupation ranks in the first quartile (top 25 percent) of occupations in regard to size. The letter "B" means that occupation ranks in the second quartile of occupations in regard to growth (the change in employment between 2006 and 2016). The letter "C" means that the average annual wage for this occupation falls between \$12.00 and \$24.49.

- 8. Average annual openings include openings due to growth as well as openings due to replacement needs. Average annual openings are not reduced by negative growth. An occupation may experience negative growth in some industries, which will affect the employment level for that occupation in the future. However, the positive growth experienced in other industries will create job openings. Therefore, in a particular occupation, average annual openings are equal to the openings due to growth plus the openings due to replacement unless the growth is negative; in this case, average annual openings is equal to the openings due to replacements only. As a result, average annual openings for a group of occupations may be greater than the sum of openings due to growth and replacements by the amount of negative growth in the individual occupations within the group.
- **9.** Limitations of the data include the following:
 - The data are intended to approximate long-term trends in the labor market and not predict future economic occurrences.
 - Occupational openings for a particular year may differ substantially from those shown in the report if the economy is in a recovery or a recession period.
 - Average annual openings reflect employment demand as a function of growth and replacement, but do not address turnover or geographic mobility.

| Beverage & tobacco product manufacturing | 2,330 | 2,470 | 130 | 5.66% |

¹ Total employment includes covered and non-covered employment, agricultural employment and self-employed and unpaid family workers. Covered employment data are from the Bureau of Labor Statistics(BLS) Quarterly Census of Employment and Wages program from Oklahoma Employment Security Commission. Non-covered employment data are average annual data from the BLS Current Employment Statistics program from Oklahoma Employment Security Commission.

² Self-employed & unpaid family workers data are produced from the projection matrix system based on Oklahoma Occupational Employment Statistics(OES) survey and BLS Current Population Survey. The estimates of self-employed in the base year are larger this projections round than they were in previous rounds because the file supplied by BLS now includes estimates of all self-employed jobs (jobs held by people primarily self-employed plus jobs held by people secondarily self-employed).

³ Employment data for Agriculture are from the U.S. Census Bureau American Community Survey 2006 and QCEW program.

* Employment data is withheld to maintain data confidentiality.
