

Oklahoma State Employment Service

Job Openings and Applicants

Introduction

Job Openings and Applicants is a review of labor supply and demand as reflected in the activities of the Oklahoma Employment Service, a Workforce Oklahoma partner. The Oklahoma State Employment Service offices provide employment services free of charge to employers and job seekers throughout the state. Job openings and applicants are classified as defined in the fourth edition of the *Dictionary of Occupational Titles (DOT)*, which is available on the Internet at <http://www.oalj.dol.gov/libdot.htm>. Users may refer to the DOT for information about the titles and codes used in this publication. Although this report does not account for total occupational supply and demand in the state, it does reflect a large source of supply and demand data.

Users should be aware of the following caveats:

- 1) The data reported herein are cumulative year-to-date for the federal program year which began on July 1, 2000 and ended June 30, 2001.
- 2) The data presented in this edition of *Job Openings and Applicants* is different from previous editions. Applicants who register for work with the State Employment Service who have experience in more than one occupation may code their employment experience using up to three DOT codes. Each applicant will only be counted in specific occupation one time but could be in the database in up to three different occupations.
- 3) The average wage is calculated only on those job openings for which the wage offered was above minimum wage. An 'n/a' in the wage column indicates that the wage was not calculable.
- 4) Occupations with less than five job openings do not appear in this publication with the exception of the industry tables.
