AREAS OF INTEREST

1. **Although Natural Resources & Mining only dropped 100 jobs over the month, it was the industry's first monthly employment decline since September 2004.** Annual growth in this industry remains strong.
2. **Construction reported its first October-to-November employment gain since 1994.** Industry employment typically drops by approximately 1.0 percent during the October-to-November period, but strong gains in **Heavy & Civil Engineering** this year helped boost employment for the month. In sharp contrast to the pattern seen nationally, the **Specialty Trade Contractors** sector also contributed to the industry's first over-the-month gain for November in 12 years.
3. **Hiring for the holiday shopping season helped Retail Trade post an over-the-month gain of 2.9 percent in November.** This gain is right in line with the sector's performance over the past five holiday seasons. Annual employment growth for the sector remained meager in November.

IN A NUTSHELL . . .

"Oklahoma's non-farm employment grew more slowly this year than in recent October-to-November periods, but reported moderate over-the-year growth in November. Although the number of unemployed and the unemployment rate increased over the month, both have improved greatly from levels just a year ago."

Lynn Gray, OESC Chief Economist
