...Bringing Oklahoma's Labor Market to Life!

FOR RELEASE: March 20, 2006

SERIES OF LABOR MARKET SEMINARS TO KICK OFF APRIL 21 IN ARDMORE

OKLAHOMA CITY – In an effort to serve the individual and corporate citizens of Oklahoma, the Oklahoma Employment Security Commission has scheduled a series of labor market information (LMI) conferences to be held this spring. The first such event is set for Friday, April 21, 2006, in Ardmore, Okla. These seminars are provided by the OESC Economic Research & Analysis division at no cost to attendees, and local businesses are encouraged to take advantage of this valuable opportunity.

The first one-day seminar, scheduled for Southern Oklahoma Technology Center in Ardmore, will feature expert presenters addressing a variety of topics that impact the state business community. These topics include employee benefits, employment forecasts, regional economic analysis, census products and more.

Other cities hosting LMI conferences in the coming months include

Enid: Thursday, April 27, 2006

Woodward: Wednesday, May 31, 2006

Oklahoma City: Wednesday, June 28, 2006

Space for the Ardmore LMI conference is limited and will go fast. To register for this no-cost event, interested parties can call (405) 557-7221 or email lmi@oesc.state.ok.us.

The OESC Economic Research & Analysis division develops, analyzes and manages a comprehensive database of state and local labor market information. While striving to produce information that meets customer needs, the division's goal is for all information to be accurate, timely and of the utmost quality. All publications and information produced by the Economic Research & Analysis division are available at no cost to the public.

The Oklahoma Employment Security Commission enhances Oklahoma's prosperity by providing economic stability and employment security. The agency achieves this in a variety of ways, including providing unemployment compensation, matching jobs and workers, referring workers to training opportunities, and disseminating labor force information to improve local economic decisions.
