OKLAHOMA EMPLOYMENT REPORT - July 2007

State unemployment rate rises to 4.9 percent in July

Oklahoma's **non-seasonally adjusted unemployment rate** continued to inch upward in July, increasing to 4.9 percent over the month. The jump resulted from large over-the-month losses in non-seasonally adjusted labor force and employment combined with a drop in non-seasonally adjusted unemployment.

Seasonal losses impact Oklahoma employment in July

Oklahoma employment dropped by more than 16,000 jobs over the month in July 2007, mostly due to seasonal education losses. This movement follows the trend seen each year at this time stretching back to 1981. Over the year, Oklahoma's **TOTAL NON-FARM EMPLOYMENT** continued to expand with an addition of 24,600 jobs.

Aside from an over-the-month loss in **Construction**, all of the monthly loss came from the **Service Providing Industries**, led by **Educational & Health Services** and **Government**. Although many Oklahoma industries contributed to the over-the-year gains, **Natural Resources & Mining** and **Government** combined to provide more than 40 percent of July's annual growth.
